Trade-marks Journal

Vol. 65 No. 3297

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

- Red, pink, orange
- Black
- White, grey, silver

Colour Claim
Colour is claimed as a feature of the trademark. The colors red, black and white are claimed as a feature of the mark. The mark consists of the following: a stylised red cardinal with red feathers atop its head and a face with black markings, a black space for separating the beak, and a black and red eye. A black stripe demarcates the cardinal's wing, and each leg of the cardinal is set apart by a small swipe of black color. The background is white. The words CD PROJEKT RED are in black.

Goods

Class 09
Computer programs, namely, computer games; films recorded on magnetic and digital carriers; VOD films; downloadable films; cinematographic films; animated films; documentary films; audio, video and audio-video compact discs containing films and computer games; blank magnetic discs; sound and image recording carriers, namely, USB flash drives, camcorders; CDs, DVDs , high-definition discs containing games and films; computer games; computer games for use on mobile and cellular phones; recorded computer software, namely, computer games and computer game consoles; downloadable computer software, namely, computer games and computer game consoles.

SERVICES

Class 38

(1) Broadcasting of films via the Internet; transmission of multimedia contents via the Internet, namely, streaming of films via the internet.

Class 41

(2) Providing games on-line; providing films on demand (VOD); providing films (non-downloadable) via the Internet; educational services in the field video game production; organization of training courses, conferences, congresses in the field of video games; organization of contests in the field of video games; electronic sports competitions, namely, organization of online and live electronic sports competitions, organization of electronic sports competition in the form of live digital sports events in the field of video games; publication of books, newspapers, magazines, comic books; production and distribution of music records, multimedia contents, namely, computer games, computer software for creating computer games, computer software for creating video games.

Class 45

(3) Licensing of computer software

SAFRAN Test Cells

Goods

Class 07

(1) Industrial machines in the fields of aeronautics and space, production machines for composite or non-composite parts in the fields of aeronautics and space, machine tools, machines for producing and repairing parts for use in aeronautical and spatial propulsion systems (turbojet engines, ramjet engines, pulsejet engines, rocket propulsion engines), motors and engines (except motors and engines for land vehicles), in particular airplane engines, turbine engines, turbojet engines, turbo-propeller engines and thrusters for rockets and spacecraft as well as their parts and accessories, included in this class, air compressors for power generators, compressors as parts of machines, motors and engines, compressors for motor vehicles, air compressors for vehicles, electric compressors, lubrication systems for airplane engines and other thrusters (machines), assembly lines for aircraft engines and their constituent parts, industrial robots, test benches for motors and engines, turbines and other thrusters (machines) for aircraft, all of these goods being used in and/or intended for the fields of aeronautics and space.

Class 09

(2) Scientific, optical, weighing, measuring, checking and inspection apparatus and instruments, namely apparatus and instruments for verifying and monitoring the functioning of aircraft motors and engines and their constituent parts, namely apparatus enabling the visual monitoring of parts, namely scanners, chemical fume detectors, radiographic apparatus for industrial use for analyzing materials and metals, namely scanners, variable-angle image detectors, touch screen displays, laser detectors, cameras, radiation detectors, camera adapters, camera batteries, digital cameras, camera memory cards, camera battery chargers, camera filters, waterproof packing for camera cases, camera flashes, camera lenses, camera shutters, camera lens hoods, camera mounts, camera tripods, laser pointers, altimeters, anemometers, variometers, accelerometers, aerodynamic sensors; electrical and electronic apparatus and instruments, in the nature of overhaul calculators, calculators for digitally regulating speed and fuel flow (FADEC), calculators for braking, temperature, pressure, vibration analysis, flight control, electric, electronic and magnetic sensors for pressure, speed, movement, temperature, position, vibration, electronic parameter processing cards, namely reading cards to be used with computers for connecting to a computer server for information in the fields of aeronautics and space, equipment electronic and systems, on-board or not, for data processing and acquisition, namely sensors, regulators, converters, transformers,

calculators in the fields of aeronautics and space, calculation and operation software for simulating the, operation and storage of test programs, computer programs and computer software for operating test benches and other measurement apparatus, surveillance systems consisting of computer hardware and software for evaluating security and performance as well as maintenance and servicing requirements for aircraft engines and/or their modules and parts, electric and electronic maintenance and control materials and equipment (integrated into airplanes or motors and engines, mounted on test benches or portable for ground interventions) for reading and interpreting data from calculators and sensors, apparatus for the recording, transmission, reproduction of sound, images and data, namely audio and video disc players, audio and video disc recorders, radios, audio and video receivers, televisions, computer software, in particular computer software and programs providing information about aircraft engines, the functioning, maintenance, intervention, repair related to aircraft engines and/or their modules and parts, computer software for managing the functioning and test operations, for repair, servicing, maintenance, overhaul and reconditioning performed on aircraft engines and/or their modules and parts, magnetic, optical and digital recording media, namely discs, video discs, optical discs, DVDs, CDVs, laser discs, USB keys, data banks, containing, in particular, information regarding aircraft engines, their functioning, repair, servicing, maintenance, overhaul and reconditioning of engines, modules and parts of aircraft engines, test benches for aircraft engines, turbines and thrusters, all these goods used in or intended for the fields of aeronautics and space.

SERVICES

Class 37

(1) Repair and maintenance of aeronautical and astronautical vehicles, space launchers, aircraft and their constituent parts, including propulsion systems for aeronautical vehicles, engines, thrusters, nacelles, thrust reversers, transmission and propulsion couplings and components; installation, assembly, repair and maintenance services for aircraft apparatus, instruments, systems , material, and electric and electronic equipment; construction, repair, installation, set-up, assembly, maintenance, repair and servicing of engines, full propulsion systems, and their subassemblies; onsite construction and installation of test benches for engines, full propulsion systems and their subassemblies.

Class 42

(2) Technical, scientific and industrial research in the fields of aeronautics and space; research and development (engineering work) in the fields of aeronautics and space; technical data analysis in the fields of aeronautics and space; engineering services related to evaluations, estimates and research in relation to the technology used in aeronautical and space vehicle systems, equipment and parts; testing of machines and materials in the fields of aeronautics and space; computer software development and design, computer programming; analysis, expertise related to aeronautical and space vehicle equipment and parts; acquisition and unloading of aircraft engine test and flight data; analysis, expertise and processing services for the acquisition of data recorded on running aircraft engines, systems, equipment and parts; test bench services for engines, full propulsion systems and their subassemblies; technical studies and projects; technical, scientific and industrial research for test benches in the fields of aeronautics and space; computer programming; development and design of computer software in the fields of aeronautics and space ; engineering services related to evaluations, estimates and research in relation to the technology used in aeronautical and space vehicle systems, equipment and parts; consulting and professional advice related to engineering; engineering work, namely technical consulting in the fields of

aeronautics and space; engineering, research and development related to aerodynamics, turbomachinery, high-temperature metallurgy, special industrial brewing processes, welding techniques, laser applications and data acquisition systems for test benches.
